The **Bot Libre Cloud Bot Platform** lets you license the Bot Libre bot platform for your own server and clients.

Develop and host bots for web, mobile, Facebook, Twitter, Telegram, Slack, SMS, email, and more.

Develop and host your own bots, and sell bot hosting and development services.

Become a bot service provider for your own clients, in your geographic region, or vertical market. Engage this rapidly expanding and evolving market.

Leverage the sophisticated Bot Libre platform and mobile SDKs, and our support, service, and expertise. Get new versions and features as our platform continues to rapidly evolve and lead the market.

"**Bots are the new apps**" - become a bot service provider and join the bot revolution.
Social Media Bots

The Bot Libre cloud bot platform lets you host and develop bots for social media. Develop bots for Facebook, Twitter, Telegram, Slack, SMS, email, and more.

Businesses are increasingly adopting social media, and need bots and automation to connect with their customers on social media, and provide e-commerce and application services through social media messengers and apps.
Chat Bots, Chat Rooms, Live Chat, and Forums

Your cloud bot platform provides chat bots, chat rooms, live chat, and forums. Provide your clients with bot services integrated with your own hosted live chat, chat rooms, and forums. Provide hosted live chat for the web and mobile. Mix live human operators with automated chat bot agents.

Artificial Intelligence

The Bot Libre AI engine is a hybrid system that seeks to emulate the human brain. The AI engine includes heuristic pattern matching algorithms, an integrated object database, a state machine processing engine, advanced scripting, vision and image processing. The AI engine can also integrate with our data analytics platform.

Architecture

The platform consists of a web client, mobile client, AI engine, web server, and database. The web client is written in HTML, JavaScript, and server side Java. The AI engine is written in Java. The Android mobile client is written in Java, the iOS client is written in Objective C.

The web server is a Java web application, deployed to Tomcat (an open source Java web server). PostgreSQL (an open source database) is used as the database.

The platform can be deployed on most operating systems, including Linux and Windows. CentOS Linux is our preferred operating system.
Packaging and Pricing

The Bot Libre cloud bot platform is licensed per runtime CPU, and has no royalty charges. Our base price for the platform is $1,000 USD, and this includes a 2 CPU platform license, remote ssh installation, and 12 months of support and product patches and upgrades.

You can also just pay for the software license of $100 per CPU, and $50 per CPU per month for support, patches, and upgrades (minimum license is for 2 CPUs).

A full source code license is also available for an extra $500.

About Us

Paphus Solutions Inc. is a Canadian corporation located in Ottawa, Canada. We were founded in 2013, by our president James Sutherland.
